STRAPPING
WRAPPING
CODING
TAPING

In the packaging industry, tape is often used to seal boxes. Taping is therefore of great importance in the damage free storage and shipping of your products, so they arrive at your customer in perfect condition. Taping machines from Cyklop ensure a reliable and efficient taping process and are easy to set up and operate. The (semi-)automatic taping machines can be operated separately but are also perfectly integrable with other Cyklop machines in your packaging line.

The CT 305 TBR is an automatic case sealer suitable for PP and PVC tape and perfectly designed for low boxes or high boxes with a small footprint.

The machine starts automatically by feeding the box into the case sealer which automatically adapts the centering device and the height to different box dimensions. This makes the box closing process easy and efficient. When a box enters the machine, the bottom and top are automatically closed with tape. The top and bottom drive belts ensure a stable transportation and a perfect box sealing.

With the CT 305 TBR, it is possible to professionally close thousands of packages per day.

Standard version of the CT 305 TBR

Options:

- Caster wheels
- Tape end / breakage detection
- Flexible scissor roller conveyor
